Attachment

Bill, see attached report from Tom and David. Looks like we are making progress. Some of the barrels will need overpacks. Chal

Hi Chal-  
Just checking in to see if there's anything to report. Let me know.  
Thanks.

**Subject:** Bremerton Gasworks Drilling Waste Barrels

Hi Mayor Lent and Mr. Martin-

A while back when I met with you, I mentioned the existence of barrels of drilling wastes that were generated by the City's contractor (GeoEngineers, I believe) during the Brownfields sampling work and inquired about having them removed. I'm not quite sure exactly how we left it, but I thought the City was going to look at the contract to see if GeoEngineers was obligated to remove the barrels. If that was done, I was wondering what that review found.

Cascade Natural Gas has their contractors working at the site and they've counted 31 barrels, 7 of which have broken open or are about to break open. Cascade has indicated that they are willing to dispose of the barrels, but are not willing to fill out the necessary hazardous waste manifests since they did not generate the waste materials.

If, for whatever reason, the City or GeoEngineers are not able to dispose of the barrels, we could have Cascade do so if the manifests are filled out. Logically, it would make sense to have GeoEngineers do this, since they generated the materials.

We would like to have these barrels removed from the site as soon as possible and would appreciate anything the City can do to help make that happen.

Please let me know what you think can be done by the City.  
Thanks.
